WEATHER-RELATED SERVICE DELAYS- UPDATE

The Trans-Canada Highway between Manitoba and Ontario opened to traffic at approximately 7:30 CST.

Our line haul operations department has begun moving freight into the region with a priority on food and medical supplies.

We are anticipating a 24 hour delay in freight operations into the Region in particular Dryden and Thunder Bay which were both severely impacted by this storm.

Some perishable freight for Kenora should deliver later this afternoon.

We apologize for any inconvenience this storm may cause.

We will provide further updates as more information becomes available.

Sincerely

Gardewine Group LP
